## Training, your way

We provide training on all aspects of FIDIC and have set out the core sessions available on the previous pages.

These can be tailored to suit the nature of your organisation, combined or made bespoke based upon the needs of your team.

Similarly, if there is a topic that you would like us to cover that isn't currently on the proposal, please let us know.

# Key contacts

The team have specialist knowledge of the FIDIC forms of contract having been involved in the drafting of several of them. The team have also written two books on FIDIC contracts: "FIDIC 4th: A Practical Legal Guide" and "FIDIC 2017: A Practical Legal Guide" and have contributed to other publications.

joanne.clarke@howardkennedy.com

Victoria Tyson is an award-winning contentious construction lawyer with over 25 years' experience in large, complex international construction and engineering disputes.

Victoria has particular expertise in the FIDIC forms of construction contract and international arbitration (ICC, LCIA, SIAC, HKIAC and UNCITRAL). She represents employers (including governments and ministries), international contractors, and consultants. She has had exposure to many high-profile and politically sensitive international projects.

Jo Clarke is a partner who focuses on international construction and engineering disputes. She has particular expertise in complex international arbitration and FIDIC contracts. Jo is fluent in French.

Jo provides advice and representation to clients involved in international construction and engineering disputes, before and after formal proceedings are commenced. Her primary focus is international arbitration, but she also acts for clients involved in other forms of dispute resolution including dispute boards and mediation.

gabriel.muleroclas@howardkennedy.com

Edward Corbett is acknowledged as one of the worlds most experienced international construction lawyers with an unsurpassed reputation as a FIDIC expert.

Edward has worked exclusively in construction law since 1984 and his experience includes contract drafting and procurement strategy as well as dispute boards, ICC arbitration, litigation and ADR. He regularly advises some of the world's major employers and contractors and his current caseload involves projects in Europe, Africa, South Asia and the Middle East.

Gabriel deals with large international construction and engineering projects and disputes. He is bilingual, speaking both Spanish and English, and is proficient in French.

Gabriel has experience in complex multi-million-dollar claims, dispute board and ICC, SIAC and other arbitration proceedings as an advisor, representative and advocate. He has acted for governments and ministries, international contractors, consultants, development banks and aid agencies. This work has included power plants, airports, seaports, tunnels, roads, railways and hotels.
